UX Designer
Luxoft

Dear hiring team,

I am writing to express my interest in the UX Designer position at Luxoft. I'm drawn to this role for the opportunity to apply my core attributes to user-focused designs. With a fundamental backbone of hard work and commitment, I take pride in my creativity, curiosity and problem solving, along with a positive and playful nature. To me, every challenge is an opportunity and no pace is too fast; I believe I would be a great fit to support Luxoft in its vision and continue supporting its direction.

With a background in hospitality and operational management, I pride myself on the relationships I form with clients and being able to effectively communicate ideas. My strong ability to read people has allowed me to understand the user in UX research, the environment of the product, and helped to develop meaningful solutions that lead user-centered, intuitive designs that allow users to achieve their goals. My work on the Elevate app helped me gain strong practical experience with end-to-end design, including implementing feedback when gaining solid user research to enhance user experience and creating attractive pixel-perfect UI responsive design systems for web and app. Designing time-sensitive projects allowed me to demonstrate my strong time management and self-motivation skills, paying particular attention to the time requirements of user testing and design iterations.

The experience of working on diverse projects and creating meaningful design solutions coupled with a love of problem solving and a passion for continuous learning has pushed me to evolve as a designer. I strongly believe that my skills, approach to design, and passion align with your company values and that I would be an asset to your team. I look forward to connecting with you and discussing why I am the right fit for the UX Designer position.

Thank you for your time!

Christian Brown
